Inventory Management System Feature Overview

Manage Information Effectively

Item Maintenance

- Multiple item code / UPC
- Multiple vendor
 - cross-reference
- Average cost
- Multiple Price levels
- Split Quantity Pricing
- Minimum / maximum
- Linking
- Nonstock
- PTD, MTD, YTD and
- Previous Year history
- 24 Month revolving history
- Multiple description
- Season definable
- Scan Check
- Web Store Export
- Image Linking

Receive By Invoice

- Automatically selects labels
- Receiving report
- Unit conversion
- Vendor discount
- Applied / unapplied freight
- Portable data terminal
- Retail Price Change

Serial Number Tracking

- Multiple serial files
- BATF approvals
- Physical inventory checking
- Sales/purchasing
 - integration
- Consignment
- Labeling
- Rentals

Item to Item Transfer

- Assemble Components

Purchase Orders

- Bill to / ship to
- Terms
- Due date, ship date and
 - cancel date
- Ship via
- F.O.B.
- Comments
- Unit Conversion
- Receiving report
- Applied / unapplied freight
- Vendor discounts
- Last cost only
- Retail price changes
- Back orders
- Automatically selects labels
- Item sales history when
 - adding items
- Multiple cross-ref pick list
- Inquire Add Function
- Portable data terminal
 - import
- Retail Price Change

Labels

- Barcode
- Adhesive and tag label stock
- Multiple label formats
- Format selectable by item
- Serial number labels
- Reprint last run
- Batch mode printing
- Multiple printer support

Sign Printing

- Multiple Size Formats
- Multiple Ranges
- Selectable Orientation
- Custom Formats
- Graphics by Item
- Graphics by Promotion
- Text Box
- Color Graphics

Physical Inventory

- Worksheets
- Cyclical counts
- Portable data terminal
 - import
- Service bureau import
- Variance reports
- Quick adjustment entry
- Multiple selection criteria
- Bin locations
- Label Printing
- Serial Number Inventory

Group Price Change

- Multiple Selection Criteria
- % change of retail price
- Dollar change of retail price
- New retail price
- Gross profit % change
- Fraction adjustment
- Multiple price level
- Low gross profit selection
- Vendor Catalog Export

Promotion

- Item promotion
- Start and stop dates
- By %, dollar, and price
- Assignable promotion #'s
- Item activity by promotion
- Markdown report
- Active promotion report
- Multiple item selection

Sales Order Entry

- MailList/AR interface
- Credit Card processing
- Shipping labels
- Pick list
- Bin locations
- PO numbers
- Freight/Shipping numbers
- Comments
- Real-time inventory
- Backorders
- POS transaction recall
- Invoicing
- Web Store Import
- Quotes

Work Order Entry

- Mail list interface
- Item history
- Serial number tracking
- Freight/Shipping numbers
- Problem notes
- Labor notes
- POS transaction recall
- Invoicing
- Printed workorder document

Automatic Replenishment

- System - ARS²**
- Sales forecasting
- Order frequency factors
- Lead time factors
- Real-time order quantity
- Real-time order calculators
- Purchase order generation

Special Orders

- Purchase order linking
- Special order received report
- Special order frequency

Vendor maintenance

- Default discount %
- PO default received qty
- EDI selectable
- Total freight charges
- Image Linking
- PTD, MTD, YTD and
Previous Year by:
Item
Cross-reference
Last cost
- Form letter
- Image Linking

Vendor Catalog Import

- Inquiry
- Searches
- Add item from catalog
- Cross-reference items to
catalog
- Preload from catalogs
- Purchase Value Reports

Matrix Grids

- User definable
Reports
- 20x10 grid format

Kits

- Kit Assembly
- Suggest/Sell

Reservations

Security

- Username
- User defined password

A/P Posting

- Find/Sort Option
- Prints formatted A/P
voucher
- Correct rounding errors
- Correct cost changes from
invoice
- Exports data to file

Manufacturer

- PTD, MTD, YTD and
Previous Year purchases
- Co-op %
- Accrued Co-op
- Co-op Used
- E-mail/Website

- **What items are creating 80% of your profit?**
Select item...
- **Need to know what lay-a-ways are three months old?**
Select lay-a-way...
- **Need an overstock report?**
Select item...
- **Need mailing labels for everyone who purchased from you in the past three months?**
Select address/mail list...
- **Need signs for the sale next month?**
Select signs...
- **Your vendor sales representative is stopping in today, and you need to know what and how much to order?**
Select purchasing...

**Each report generated is designed to
provide the information you need
to make informed inventory
management decisions.**

The ARS Report Wizard Feature guides you through the easy process of creating reports!

**A list of report formats is available for each report menu option.
Just select a report format that contains the desired data.**

**Each report format is designed for the specific purpose of
providing valuable information to reduce time
and assist with making management decisions.**

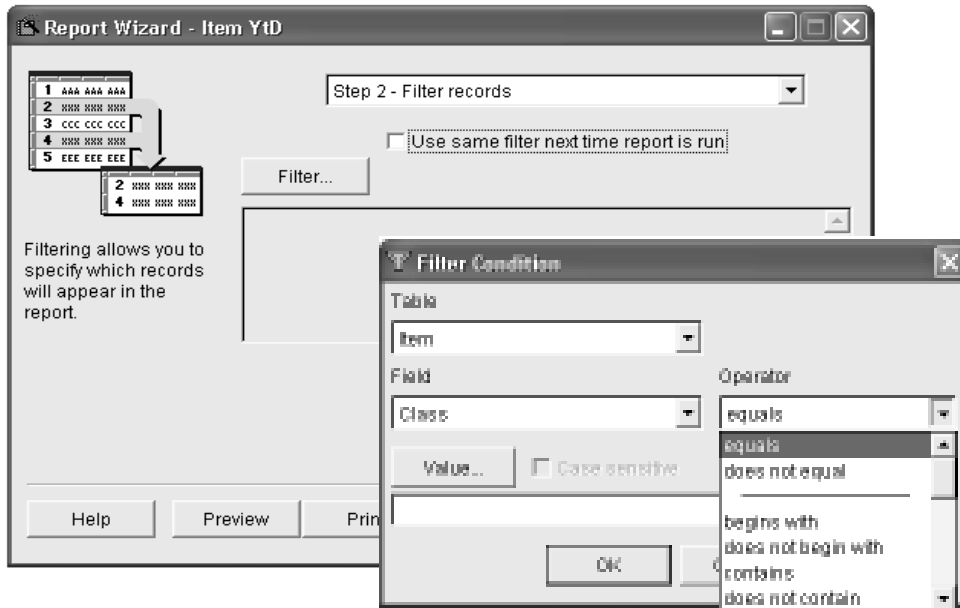

*“A simple Quantity on Hand report at the end of the year prints
the item with its current quantity on hand and total value of inventory.”*

*“The Sales Analysis report ranks items from the
most profitable item to the least profitable
to assist with determining next years product mix.”*

*“An A/R Aging report prints a list of accounts with
current balances and past due amounts.”*

**The Report feature also provides price labels, store signage,
statements and many other reporting & printing functions.**

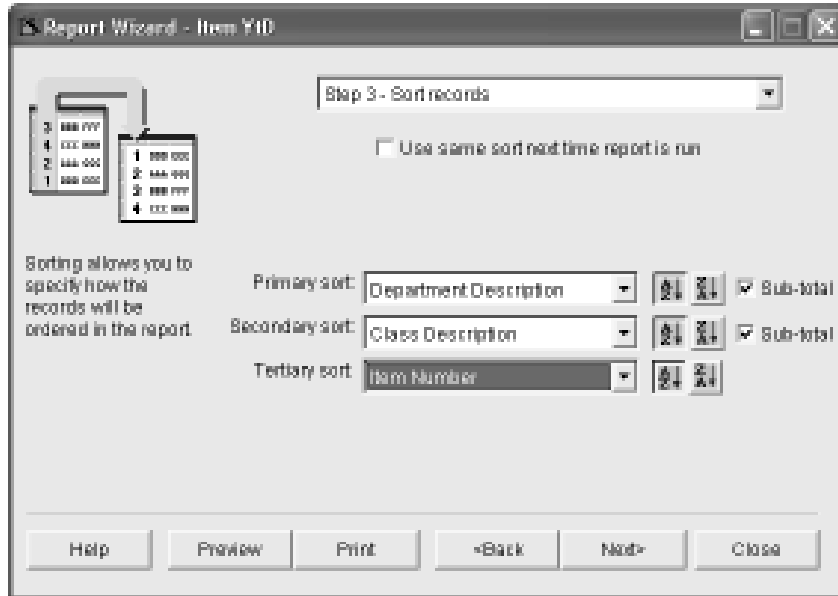

The ease of the Report Wizard allows you to skip or go back steps to make changes before you print the report.

The Powerful Filtering Tool is available through out the ARS System allowing precise data to be selected for a report.

- **What items are in an overstock situation?**
Filter quantity on hand with year to date sales.
- **Who are your best customers over the last six months?**
Filter customer purchase amount with a date range.
- **Need to complete a physical inventory on one part of the store?**
Filter report by specific inventory classification.
- **What items are creating 50% of your profit?**
Filter items with top profit percentage.
- **Need mailing labels for those customers that purchased an item on recall?**
Filter customer purchase history by item number...
- **Need signs for the sale next month?**
Select signs and the items on a promotion.
- **Vendor sales report coming in today, and you need to know what to order?**
Select purchasing reports based on criteria you select.

**The Report Wizard's Preview Option
allows you to preview and make
changes to your report - before you print.**

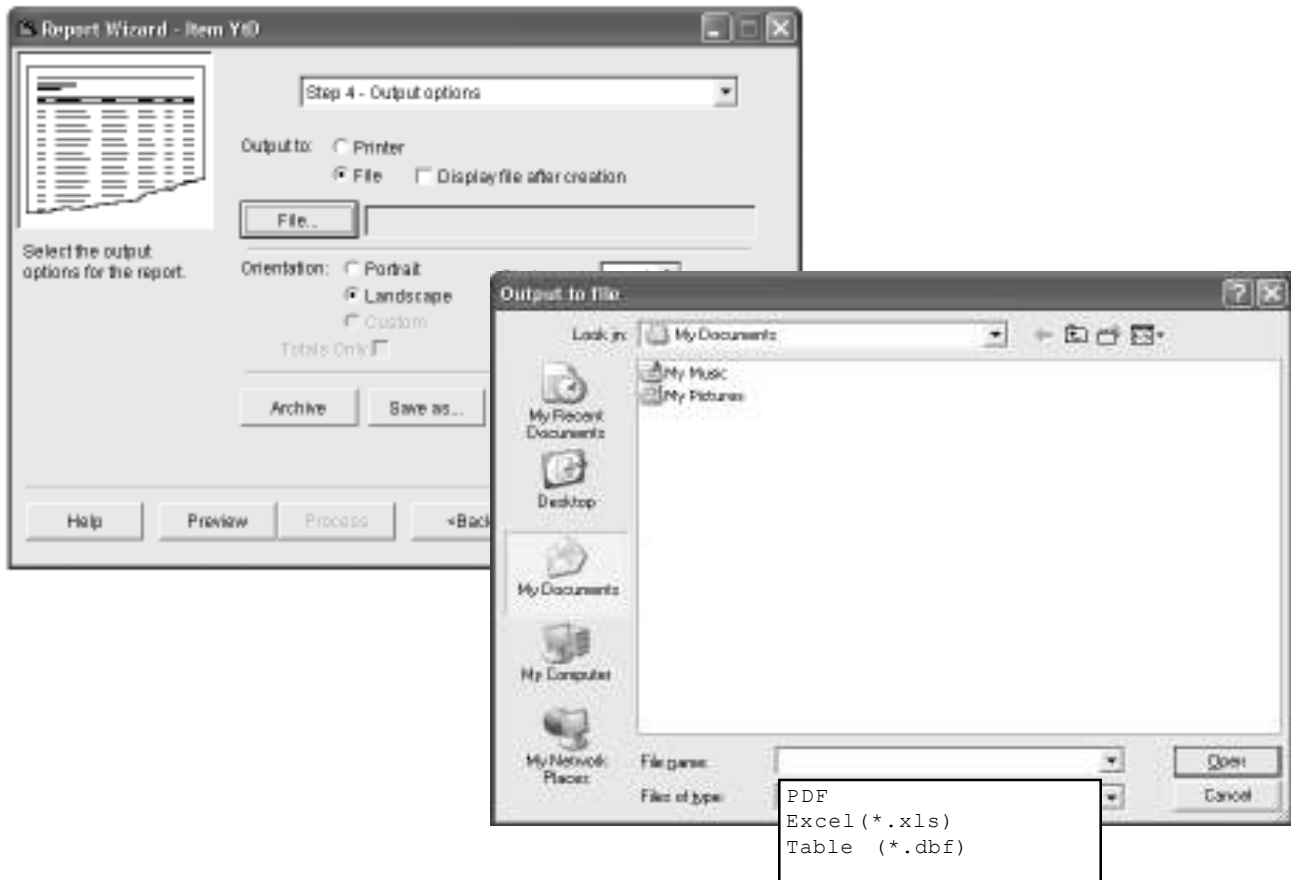

**Sorting allows for the organization of information
and to subtotal groups of products on the printed report.**

- Sorts and subtotals can be used together to create unique reports from the same report format.
- Sorts can be toggled from ascending or descending order.
- Subtotals may be turned on or off.

The Report Wizard Provides Unsurpassed Reporting Flexibility

**View a Report on the Screen • Print a Report • Save a Report
Output a Report to Multiple File Types**

- Print the report on any installed windows printer.
- Save the report to a file so that it can be exported to either a spreadsheet, database or text format.
- Archive the report for review later.
- Preview the report to the screen
- Save the report format, filters and sorts as a template to re-use later.
- Print reports with totals only.

Preview Reports Directly on the Screen

Inventory Linking

- ◆ Carton to Pack Conversion
 - ◆ Case to Pack Conversion
 - ◆ Box to Stick Conversion
 - ◆ Carton to Case Conversion

Receive inventory by the case, pallet, load, skid or carton, then sell the same inventory in any quantity increment you wish.

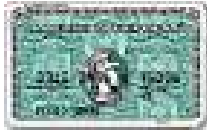

The ARS Retail System links different **UPCs** and **inventory values** together - creating a system that allows for purchasing and selling of the inventory any way you want!

Linking keeps accurate and up-to-date inventory data, as well as easing the inventory maintenance process!

CREDIT CARD DEBIT CARD CHECK PROCESSING

Process credit cards, bank debit cards & checks
directly through the
ARS Point-of-Sale & Sales Order Entry Systems

Advantages of integrating credit card/debit/check processing with the ARS Retail System:

- Retain current bank and current rates
- Improved throughput
- Ease of reconciliation
- Reduces errors - no duplicate entry required
- Reduced handling of credit card receipts
- Reduces processing equipment
- Reduces training time

Contact an ARS Sales Representative for Configuration Options

visit the ARS Solutions Web Site www.arss.com
or call 1-800-547-7120

GIFT CARD PROCESSING

**The ARS Gift Card System offers small retailers,
at a small cost, the same prepaid gift
cards offered by mass merchants.**

- **Cash flow is enhanced by collecting payment prior to the purchase of product and services.**
- **Attracts and retains new customers, building and creating customer loyalty.**
- **Customers can purchase cards and use them as prepaid debit cards.**
- **The merchant can offer an incentive to customers to encourage the purchase of gift cards.**
- **Use cards as a gift for customers that make a purchase beyond a set amount.**

- Step One:** ARS designs the card.
- Step Two:** Determine the denomination and quantity of cards to stock.
- Step Three:** ARS prints the cards with your layout on the front and a unique barcode on the back.
Available colors: Green/Red/Black. Stock cards are white with the barcode printed in black.
- Step Four:** Import the cards into the ARS System. Display the cards in the store.
- Step Five:** Scan the barcode on the card/cards when purchased at ARS Point-of-Sale.
Cards stolen or not scanned will not be activated and will not be redeemable.
- Step Six:** Redeem the gift card at the ARS Point-of-Sale.

**Statisticians estimate 750 million gift cards
will be in use by the year 2006!
A gift card system is no longer just value added-
*It's A Need To Stay Competitive!***

This simple but unique system is available
for a one time setup fee of \$99.00
This includes the layout and design of the card and the first 25 cards.
Each additional card is \$.50 (minimum quantities of 25).

SCANNING & WIRELESS CONNECTIVITY

Symbol PPT8800 Scanner Device

When the iPAQ slips into the Symbol SPS 3000 Cradle it becomes a wireless device capable of scanning bar codes or entering data in real-time mode.

ARS has implemented this device to perform:

- Pre-Scan Customer Purchases
- Store to store transfers
- Many other functions performed by portable data terminals
- Physical inventories
- Direct store deliveries

If your PDA can run an Internet Browser - it can scan within the ARS System!

- **Pre-Scan Customer Purchases** - Use this device to create a suspended sale that can be simply recalled at the Point-of-Sale. This feature is used when the product is back stocked, not capable of being brought to the register, or by sales people assisting customers on the sales floor.
 - Multiple devices can be operating concurrently
 - Multiple @ functions
 - Void item function
 - Name transactions
 - Scan merchandise
 - Subtotal displayed
 - Unlimited transactions
- **Physical Inventory Counting** - Use this device in conjunction with the ARS System physical inventory process to update the physical counts.
 - Multiple devices can be operating concurrently
 - Select from Multiple Inventory Groups
 - Entry Mode with Scanning and Quantity Entry
 - Real-time Inventory Counting
 - Quick Entry Mode with Scanning
- **Product Verification**
 - Serial Number Verification
 - Price Verification
- **Store to Store Transfers** - Easily create a transfer inventory out to a second location.
 - Multiple devices can be operating concurrently
 - Create Multiple Functions
 - Scan merchandise

Feature Specifications for use with the ARS Retail System:

- Windows 2000/XP
- .Net Services Configured
- Web Browser on the Device
- Wireless access point with 802.11b integration

VENDOR CATALOGS

**The ARS Inventory Management System Vendor Catalog
Feature allows for an easy and quick way to add items
into inventory & inquire if a vendor stocks a certain item.**

TRAINING & SUPPORT

ARS Solutions Provides Training & Support that results in the Successful Implementation of your Inventory and Point-of-Sale System

- **Hands-On Interactive Informative Demonstrations**
- **Assistance with Hardware Choices**
- **Detailed Task List that Guides you Through the System**
- **Personal Training that Fits Your Schedule and Meets Your Needs**
- **Assistance with Acquisition of Vendor Data Pre-Load and Catalogs**
- **System Training Mode - Learn on Your Data**
- **Support When You Need It**

Installing the system is just a small part of what we do.
**Teaching you on how to utilize the ARS Retail System to
Increase Turns, Reduce Inventories & Eliminate Markdowns
IS OUR MAIN GOAL**

The majority of a company's capital is invested in inventory.
The ARS Retail System is a proven tool that will assist you in managing that investment.

In-Depth Business Analysis Reports

Knowing if an item is moving well or slowly is critical to profitability.
Without the best computerized inventory tracking system &
training on how to utilize it, your ability to respond is at best limited.

ARS Solutions
Providing the System & the Knowledge.
ARS Solutions is with you every step of the way!
