

ID CHECK

Easily force the Check of a Customers Legal ID (valid driver's licence) on a sensitive purchase, such as tobacco, liquor, ammunition or firearms.

It is quick and efficient with the ARS Retail System!

FEATURES OF THE ID CHECK:

Magnetic Card Reader

Scan the state drivers licences to verify the age.
Federal ID Standard, WI, PA verified.

Manual Entry Allowed

Entering the date from some form of ID will calculate the valid age for the purchase being made.

Bypass Allowed

The bypass allows the cashier to continue a transaction but is reported during the summary report.

Clerk Required Option

Turn this option on or off by individual clerks. Very useful when training new clerks/cashiers.

Summary Report by Clerk

A summary report of how often the clerks checked the ID.

Transaction or Item Check

Turn this option on at the beginning of a transaction or for an individual item.

This option may be turned on for clerks to assist them in verifying a customer's age before a purchase, protecting them and the operation from a lack of judgement during high volume times.
