

**The ARS Retail System
provides features
that result in keeping a
Well Organized
Warehouse Inventory**

BIN LOCATIONS

**Fill E-commerce Orders, Mail Orders, Call-in Orders,
Distribution Orders and Store Stocking Requests
Efficiently and Correctly Every Time!**

- A bin location, the specific location an item can be found in the warehouse, is assigned to each item.
- The pick list is unique to each order & includes the bin location of the item.
- Pick lists are printed in bin location order, increasing efficiency.
- User-defined fields available for displaying additional bin or return locations.
- Each item has a separate bin location and can have more than one location.

**From receiving to picking-and-packing,
the process is easier, faster & more efficient.**
